Education

IT Web Programming Certification
NSCC Halifax, NS
Expected graduation June 2026

Skills

Frontend
JavaScript, HTML, CSS, responsive design, React, Electron, Flutter

Backend
NodeJS, TypeScript, Express, Java, PHP

Database
MySQL, MariaDB, MongoDB, PostgreSQL

Soft
Reliability, collaboration, accountability, critical thinking, quick learning, time management, troubleshooting

Career Objective

College student web developer with a well rounded set of skills and coding languages. Started learning programming at a young age and has a strong passion for logic puzzles and problem solving.

A quick and avid learner, eager for a position that would challenge me to expand upon my knowledge and expertise as a web developer and IT generalist.

Projects

Sandlot Parkour App

Full-stack web application created using PostgreSQL, Typescript, Node, and Express for the backend and React and Typescript for the frontend.

Displays dynamically rendered statistics and graphs to users using a fully responsive layout with optimized keyboard navigation support.

Chirper

Laravel-based full-stack Twitter clone. Uses MySQL for database management. Supports user registration and login and has an advanced Eloquent-only search function to filter chirps.

MTG Viewer

Basic full-stack CRUD application. Utilizes Bootstrap and React frontend with a MongoDB Atlas powered API to serve Magic: the Gathering card information to users.

Work Experience

Retail - Michaels Canada
Nov 2022 - Aug 2025, Dartmouth NS

- Worked in customer service. Helped over 2,000 customers find what they were looking for and/or solve any issues they may have come across.
- Received Employee of the Month in 2023 for my ability to clearly communicate with customers.

College Achievements

- Attended class on time for >99% of classes.
- Submitted 100% of assignments before their due dates and received >99% grades on average.
